

Is Your Business Vision Friendly?

Accessible Publications Consultants is compiling a resource guide for consumers on their rights under various disability laws and resources for people with visual disabilities. Part of this resource guide will include a section listing vision friendly businesses and health care providers.

A vision friendly business is one that complies with the Americans with Disabilities Act as it applies to people with visual disabilities. This means providing assistance or having documents available in large print or other accessible formats.

To be included in this list you must:

- Provide documents and publications in large print or other accessible format
- Be willing to assist patients/customers in filling out applications or other forms or finding information or products
- Be willing to read any documents to persons with visual impairments
- Establish an accessible website
- Provide training to your staff on effectively working with people with visual impairments
- Have these policies in writing

Upon receiving written confirmation of the above we will issue you a certificate naming you as a vision friendly provider of services.

For information on complying with the Americans with Disabilities Act or for staff training please contact Robert Goodman, MSW at accessiblepublications@gmail.com or call 561.465.2224
